# "BH-1" Bluetooth® Head Set

When the optional BU-1 Bluetooth® Adapter Unit is installed, you may use the optional BH-1 Bluetooth® Headset as a wireless link to send and receive audio to the Transceiver\*.

\* Check with your Vertex Standard Dealer or Catalog for applicable models.

### **Controls & Connections**

- 1 Microphone
- 2 POWER switch
- ③ VOLUME (-) switch
- 4 VOLUME (+) switch
- (5) LED Indicator

Blinking Blue: When the BH-1 Bluetooth® Head-

set is correctly recognized by the

transceiver.

Blinking Red: When the BH-1 Bluetooth® Head-

set is not correctly recognized by

the transceiver.

Blinking Red/Blue: Battery Voltage is Low.

#### 6 PTT switch

Press this key to transmit. Release this key to return to receive.

## **7** Earphone jack

If you use the Marine Transceiver, the BH-1 is not possible to listen to the stereo signal.

### **8 SPEAKER**

### Earhook

You can wear the BH-1 on your left or right ear.

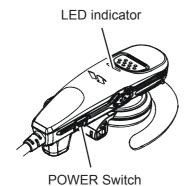

## Pairing

Before you can use your BH-1 for the first time, the BH-1 and the transceiver must be paired.

Refer to the BU-1 Bluetooth® Adapter Unit Manual for Pairing instructions.

- O Please bring the BH-1 and the Transceiver close together when doing Pairing.
- 1. Make sure that the BH-1 is off.
- 2. Press and hold the POWER switch for five seconds, until the LED indicator blinks red/blue alternately.

When the BH-1 is correctly recognized (Requires a 20 to 30 seconds) by the transceiver, the LED indicator will blink blue.

BH-1 is not designed to attach to a helmet. Specifications are subject to change without notice.

## **Turning ON and OFF**

#### To turn the BH-1 ON

Press and hold the POWER switch for three seconds, until the BH-1's LED indicator glows red, and the beeper sounds a high pitch tone.

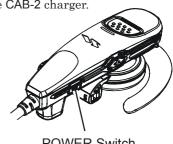

When the BH-1 is correctly recognized by the transceiver, the LED indicator will blink blue.

OWhen the BH-1 is not correctly recognized by the transceiver, the LED indicator will blink red.

## To turn the BH-1 OFF

Press and hold the POWER switch for five seconds, until the BH-1's red LED indicator blinks rapidly, the beeper sounds two brief tones, and the BH-1 turns off.

**Note**: The BH-1 is automatically turned off when it is inserted into the CAB-2 charger.

POWER Switch

## **Effective Communications Range**

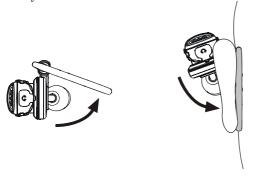

The communications range between the BH-1 and the Transceiver is around 10m (33 ft).

Obstacles between the BH-1 and the Transceiver may shorten the communications distance.

If you move out of range, the beeper sounds a low pitch tone. If you move back into range, the beeper sounds a high pitch tone.

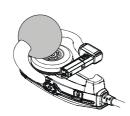

## Wearing the BH-1

- 1. Open the earhook.
- 2. Loop the earhook over your ear.
- 3. Press the BH-1 to your ear.
- 4. Adjust the flexible boom microphone by bending the boom towards your mouth.

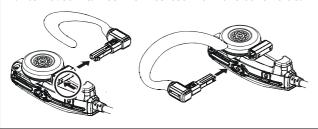

For more comfort when wearing the BH-1, affix the supplied sponge on the speaker and insert the supplied sponge ball into the earhook, and adjust as necessary.

The BH-1 comes ready to fit the left ear. You may change the BH-1 to fit the right ear in the following procedure.

- The Earhook is removed by pushing it out with a pointed object.
- 2. Removed Earhook is inserted from the other side.

## Operation

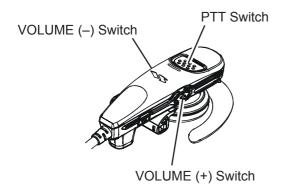

## Transmission

Press the PTT switch to transmit, and release the switch to return to receive (Depends on transceiver settings).

## Adjusting the Volume level

Adjust the receiver audio level, using the VOLUME (-) or (+) switch.

VOLUME (+): Adjusts the receiver audio level upward. VOLUME (-): Adjusts the receiver audio level downward.

### **Battery**

When the battery voltage becomes low, the BH-1's LED indicator will blink red/blue alternately, the beeper sounds a low pitch tone, and a "**T**" icon will appear on the display of the transceiver.

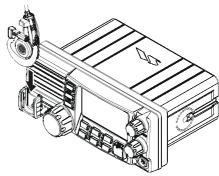

If the battery has never been used, or its charge is depleted, it may be charged by connecting to the CAB-2 Charger Sleeve, as shown in the illustration.

- 1. Attach the CAB-2 to the transceiver.

  Please refer to the transceiver's manual for installation of CAB-2.
- 2. Insert the BH-1 into the CAB-2.

**Note**: The BH-1 is automatically turned off when it is inserted into the CAB-2 charger.

3. If the BH-1 is inserted correctly, the LED indicator will glow Red. A fully discharged battery will be charged completely in 3 hours. When charging is finished, the LED indicator will glow blue.

### Battery saver

If there has been no signal or key activity for 20 seconds, the Battery Save automatically puts the BH-1 to "sleep", to conserve battery life.

When a signal is received or the PTT key is pressed the BH-1 will be active again.

Refer to the Transceiver Manual for Battery saver instructions

## **Specifications**

Bluetooth specification Ver1.2
Bluetooth profiles A2DP, HSP

Radio Frequency 2403 MHz - 2480 MHz

Modulation method GFSK
Transmitter output power
Receiver sensitivity 0 dBm Class 2
<-80 dBm
Distance (open area) 32 ft (10 meters)

Audio format SBC

Audio frequency range 100 Hz - 20 kHz

Power supply Rechargeable Lithium-Polymer

Battery life 3 hours

Button/Switch Power On/Off, Volume Up/Down, PTT

LED indicators Power on: Flash blue twice Unlink: Flash red

Link: Flash blue
Pairing: Red and Blue blinking

Battery low: Flash red and blue Power off: Flash red 3 times 32 °F to 104 °F (0 °C to 40 °C)

Operating humidity 5 - 90 %
Certification FCC, CE, BQB
