programmed, successful pressing of the UP key will show the
Figure 6: Mounting Using the CM10

Mounting Bracket (Option)

Installation with CM10

1. Use two screws (not provided) to attach the mounting bracket to the wall. Position the bracket so that the top edge is flush with the wall.

2. Insert the mounting bracket in the projector and fasten it with the two screws.

3. Insert the transceiver in the bracket and fasten it with the two screws.

4. Slide the bracket into the hole. Connect the antenna and power cables.

5. Cut out the rectangular hole and mark holes for the screws.

6. Fasten the four screws into the wall.

After Figure 1, refer to the following procedure.

Flush Mount Bracket

Figure 7: Installation with CM91

Installation with CM91 Flush Mount Bracket

1. Slide the bracket into the hole. Position the four screws into the wall.

2. Insert the transceiver in the bracket and fasten it with the two screws.

3. Insert the mounting bracket in the projector and fasten it with the two screws.

4. Use two screws (not provided) to attach the mounting bracket to the wall. Position the bracket so that the top edge is flush with the wall.
